

Bright ideas in cost-efficient shading solutions.

Hendrick Architectural Products
Cutting Edge Metal Solutions

Just as much shade, not as much cost.

*Hendrick's cutting edge
sunshade solutions can help
bring your vision to life.*

Don't let tight budgets keep your designs from seeing the light of day. Hendrick's new line of sunshades are simple but effective solutions in providing shading that the more expensive and complex designs provide.

- ***Clean Design***
- ***Economical***
- ***Easy to install***

We now offer custom and standard shading designs that help architects fulfill their vision and keep costs in check.

Introducing a sunshade program that combines solid performance with solid value.

With ever-rising energy costs, architects and developers are increasingly seeking new and innovative ways to control the temperature and climate conditions inside buildings. Blocking unwanted light can contribute significantly to that effort.

When you are faced with a sunlight management job that requires clean design, reliable functionality and superior cost efficiency, look to Hendrick Architectural Products.

Our standard shading solutions give you ready-to-install design flexibility. These standard systems are perfectly suited for clients with low-cost needs.

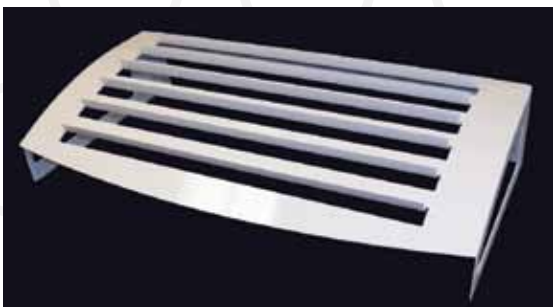

- ***Schools***
- ***Universities***
- ***Municipalities***
- ***Hospitals***

Our sunshades also gain LEED credit for recycled content and energy savings.

Hendrick's shading solutions provide a variety of exciting options for what's possible in sunshade design.

Our new louver shades seamlessly blend style, simplicity and effectiveness

In addition to perforated shades, our new line of louvered sunshades are designed to effectively block unwanted sun and allow a comfortable amount of light into temperature-sensitive buildings. Their simplicity of design helps keep costs reasonable and projects on budget. The louver shades can be mounted either horizontally or vertically giving architects a multitude of design options to consider.

***Don't limit your thinking –
bring us your design ideas***

Hendrick routinely exceeds the boundaries of standard systems to fulfill the vision of our architectural clients.

Our team will work with you on your custom perforated sunshade plans and make sure they are specified according to your pattern and material requirements.

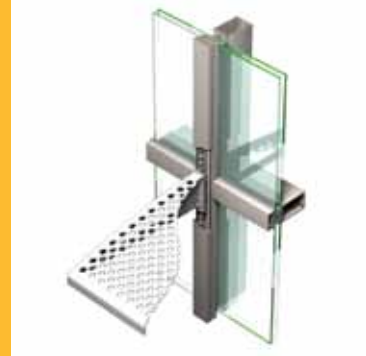

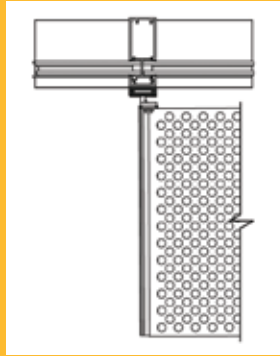

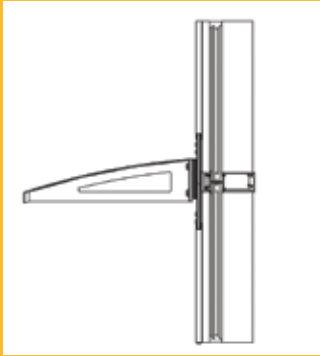

Call or submit a request online to arrange a consultation or request a quote for your custom architectural design.

***Call Hendrick and we'll
help your sunshade ideas
see the light of day!***

Our shading solutions are created for easy installation by any qualified contractor.

Attach to masonry, concrete, curtain wall, or glass mullion (shown)

We manufacture our shades right to your specs

Our standard designs can be fabricated and attached to commonly used substrates and you have the choice of an integrated attachment bracket system or a separate bracket design. Choose your hole pattern, surface finish and coating... it is that easy.

We have provided a number of online tools, dimensions, and specifications for our standard metal canopies on our website.

Hole pattern samples and test data are available upon request.

Contact us for custom sizes, hole patterns and test data at 1-877-840-0881 or email us at sales@hendrickarchproducts.com.
