NOTES TO G.C.

- Give special attention to any obstructions to ceiling pockets & cables (i.e. ducts, sprinkler pipes, drain pipes, electrical conduits, etc.).
- One steel C-channel** (flanges down) to be supplied & installed by others. Alternate steel support to be approved
- *C-channel designation:
- North & South America = C8 × 11.5 [C200 × 17] Europe = C200 × 75 Asia = C200 × 80
- Attachment details of C-channel** to structure to be designed by others & must not interfere with Skyfold hangers or motor unit or lifting cables. Support steel above the wall along its axis must be parallel to the floor within $\frac{1}{2}$! [12.7] for the entire length of the wall (this includes loaded deflection).
- Structural steel support & bracing must not interfere with motor mounts or ceiling supports.
- Sprayed-on freproofing (mineral wool & cement) is not recommended for use on the steel support to which Skyfold is attached. An intumescent coating or firm is preferred. Local building codes must be respected. Freproofing is by others.
- Maximum cable tension: Approximate weight of wall: Maximum weight per hanger: xxxx lbs. [xxxx kg.] XXX lbs. [XXX N.]
- Specified electrical: 208 VAC, 3Ø, 60 Hz.
- POWER MUST BE AVAILABLE AT TIME OF INSTALLATION.
- THE ELECTRICAL CONTROL BOX IS TO BE MOUNTED BY THE ELECTRICAL CONTRACTOR.
- 24 volt key switch controls & boxes to be installed by electrical contractor as per standard light switch. Boxes to be fitted at desired key switch location with suitable cable run back through ceiling void to control box position, including sufficient spare to allow connection, key switches are supplied by Skyfold & are required on each side of the wall.
- Motor size: Full load amp: Varies - project-specific. XXXX A
- 11. Skyfold requires two $24^{\circ} \times 24^{\circ}$ [610 x 610] (minimum) access ponels in acoustic ceiling directly beside motor for installation & mointenance of system. Not required if finished ceiling is suspended ceiling files.
- Drive unit to be installed prior to construction of acoustic barrier & pocket. All pocket construction (gypsum, suspended ceiling tile, framing, etc.) is by others.
- Do not scale from this drawing. All dimensions must be verified on site.
- Dimensions in [] are in millimeters (mm) unless noted otherwise.
