The modified wear layer of Amtico Assura offers enhanced slip resistance without compromising aesthetics.

Assura's slip performance characteristics provide the best balance between design flooring and safety flooring, while still being easy to maintain. Although not classified as a safety floor, Amtico Assura meets internationally recognized European and US Safety standards.

Assura's 26 designs provide a broader range of designs and layouts, unlike many traditional safety floors, while still maintaining a high level of durability and performance with a 20 year wear-out warranty. Choose from wood, stone or abstract, utilizing the versatility of Amtico Assura, high design, enhanced slip resistance, to retain a high-class finish where a high performance floor is required.

Amtico Marine products offer an unrivalled reputation for aesthetics, high performance, design flexibility and easy maintenance.

Installed in numerous marine projects across the world, it is one of the first products in its class to fully comply with Modules B and D of the Marine Equipment Directive (MED) and achieve Wheelmark approval issued by Lloyds Register verification.

Amtico Marine products therefore meet the fundamental safety requirements of the International Maritime Organization (IMO).

AMTICO MULTIPLE PERFORMANCE SYSTEM

Amtico International Multiple Performance System

All Amtico floors have our world-leading multiple performance system. Individually, each of the layers can be considered the most advanced of their kind.

Together, they give our flooring a completely realistic look and unrivalled durability.

Urethane Treatment

A surface that protects against everyday wear and tear. Added slip, scuff and stain resistance and lower maintenance.

Performance Wear Layer 1

Ceramic impregnated for improved slip resistance and durability. (R9 rating)

Performance Wear Layer 2

This floor has a high-density layer. Engineered to withstand indentations and protect against everyday wear and tear.

Aesthetic Layer

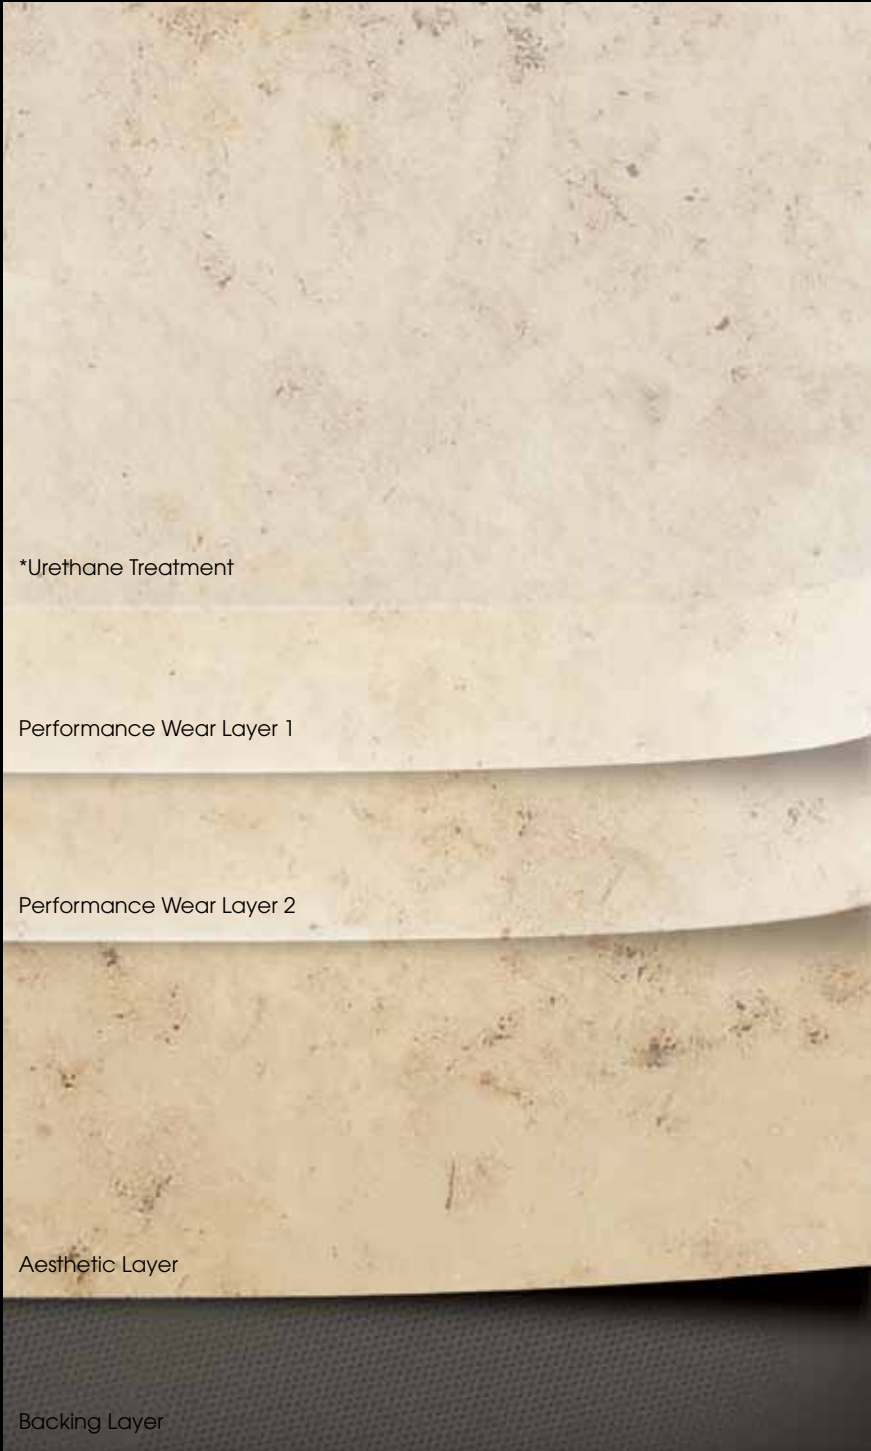

Created by our in-house design team.

Backing Layers

Made from 100% recycled materials (the whole product is 100% recyclable).

*Urethane is standard on all products (with exceptions). Please refer to the product sections for further details.

AMTICO ASSURA MULTIPLE PERFORMANCE SYSTEM

Urethane Treatment
A surface that protects against everyday wear and tear. Added slip, scuff and stain resistance and lower maintenance.

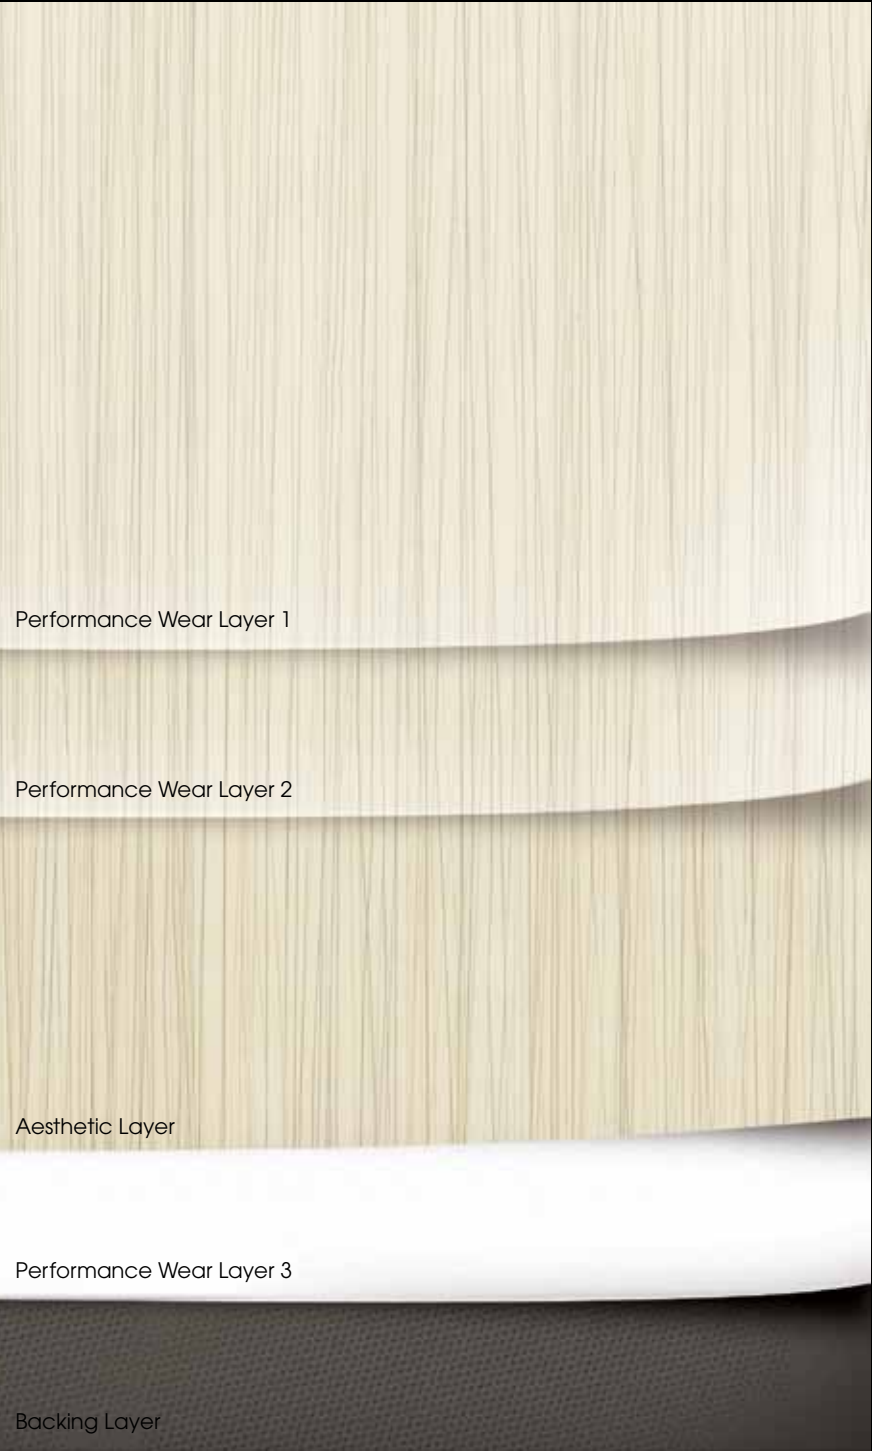

Performance Wear Layer 1 and 2
Impregnated with engineered ceramic particles for improved slip resistance in wet conditions. This high density wear layer is designed to withstand indentation and protect against everyday wear and tear. High durability. (R10 rating)

Aesthetic Layer
Created by our in-house design team.

Backing Layers
Made from 100% recycled materials (the whole product is 100% recyclable).

*Urethane is standard on all products (with exceptions). Please refer to the product sections for further details.

AMTICO MARINE MULTIPLE PERFORMANCE SYSTEM

Performance Wear Layer 1
Improved slip, scuff and stain resistance. Engineered ceramic particles provide durability and reduced flammability by forming a char layer during the burning process.

Performance Wear Layer 2
Made up of a polymer alloy, this layer offers reduced smoke production and toxicity during burning, and meets the stringent criteria required to achieve Wheelmark certification issued by Lloyds Register Verification.

Aesthetic Layer
Created by our in-house design team.

Performance Layer 3
A combination of PVC and resins which form an engineered polymer alloy. The added performance fillers provide low smoke/toxicity and flammability characteristics.

Backing Layers
A PVC backing layer to provide additional low flammability.

*Urethane is standard on all products (with exceptions). Please refer to the product sections for further details.

AMTICO TECHNICAL SPECIFICATION

Standard	Reference	Result

FOR
EVERY
SPACE
THERE'S
SPACIA

Available across larger formats with over 200 sku's, Spacia offers a range of striking wood, stone and abstract designs.

Spacia delivers a flooring solution ideally suited for today's varied commercial and residential environments.

Whatever the application, wherever the space, Spacia matches natural looks with great performance.

SPACIA TECHNICAL CLASSIFICATIONS

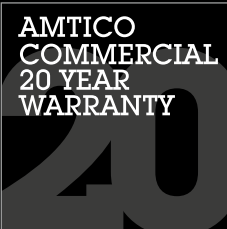

AMTICO INTERNATIONAL ACCREDITATIONS

OUR ETHOS IS TO COMBINE CREATIVITY AND INNOVATION WITH THE HIGHEST LEVELS OF QUALITY - QUALITY OF DESIGN, MANUFACTURING, PRODUCT AND SERVICE.

 BREEAM	Amtico International products fall into the soft floor finishes BRE category and correspond to the ratings listed on the BRE Global Green Guide on-line generic specification.	 NF CSTB	Amtico International products have received the NF mark of quality issued by the CSTB (French Standards organization).
 floor score	Amtico, Spacia and Spacia Access products are third party certified for low-VOC emissions contributing towards good indoor air quality	 CE EN14041	The CE mark is a confirmation by Amtico International that our products are in compliance with European health, safety and environmental requirements (as required by Council Directive 89/106/EEC and detailed in EN 14041).
 U	Amtico International products comply to European health and safety requirements, of the 89/106 EU directive.	 UPEC	Amtico International products have been UPEC classified following CSTB testing, therefore conforming to local French legislation.
 FEB Fachverband der elastischen Bodenbelagshersteller e. V.	Amtico International are members of the professional association for flexible floor covering manufacturers in Germany.	 DGNB Deutsche Gesellschaft für Nachhaltiges Bauen e.V. German Sustainable Building Council	Amtico International GmbH is a member of the DGNB German Sustainable Building Council.
 U.S. GREEN BUILDING COUNCIL MEMBER	An organization whose mission is sustainable built environments and improved global health.	 BSI ISO 14001 certified	Amtico International products comply with BSI ISO 14001 environmental standards
 LLOYD'S REGISTER QUALITY ASSURANCE MEMBER BS EN ISO 9001	Amtico International uses the BS EN ISO9001 quality management systems and has been approved by LRQA.	 CANADA GREEN BUILDING COUNCIL MEMBER CONSISTENT OUTPERFORMER DURABLE 2019	An organization whose mission is sustainable built environments and improved global health.
 0038/YY	Amtico Marine fully complies with modules B & D of the Marine Equipment Directive and has achieved Wheelmark approval issued by Lloyd's Register Verification.	 GEV-EMICODE PLUS very low emission	Amtico International Universal 2-Part Adhesive has been awarded a licence for the use of EMICODE very low emissions.

AMTICO INTERNATIONAL WARRANTIES

ASSURANCE OF OUR COMMITMENT TO QUALITY AND DURABILITY.

AMTICO INTERNATIONAL FLOORCARE

FOR FULL DETAILS VISIT WWW.AMTICO.COM

Maintenance (general)

Amtico International urethane coating makes it easier to clean and maintain our flooring. Appropriate maintenance procedures will help to preserve the appearance and extend the service life of the floor. The frequency of maintenance will depend on the amount of traffic, degree of soiling and type of floor chosen.

Residential Maintenance

Amtico International flooring requires no regular refurbishment (e.g. sanding) or repair. As part of routine cleaning use Amtico International FloorCare Maintainer for that extra deep clean. Apply using a micro-fiber mop. Rinse the mop frequently and change the solution when it becomes dirty. The amount of cleaning depends on the traffic and the floor chosen, but a weekly wipe over is usually enough.

Commercial Maintenance

For large areas a scrubber/drier or rotary buffing machine is recommended. Floors should be regularly cleaned either by mopping or using a scrubber/drier or rotary buffing machine using our Amtico International FloorCare Maintainer and a red 3M pad. Periodically the floor may require deep cleaning and can be re-coated with our Amtico International FloorCare Dressing (not recommended for Spacia Access).

Maintenance Advice

- Avoid using aerosol sprays and other silicone based products as overspray can leave a residue and make the floor slippery.
- Spillages should be wiped up immediately. Residues of oils and greases are potential slip hazards, the affected area should be thoroughly cleaned with Amtico International FloorCare Maintainer, or our ready to use Amtico International Spillage Remover.
- Avoid contact with rubber, asphalt, some paints and shoe polishes, which can potentially stain your floor.
- Do not allow cigarettes, matches or other hot items to be deposited on the floor as permanent damage is likely to occur.
- Amtico International floors have good scratch resistance properties, however sharp edges on some items of furniture can damage the floor and care should be taken when using vacuum cleaners as they may scratch your floor.
- The use of furniture cups, felt pads or glides are essential to help reduce the risk of scratching your floor.
- Do not drag heavy items of furniture across the floor as this will result in serious scratch marks. Care should be taken with a brand new floor, when furniture and other appliances are being fitted or placed back into the space.
- Casters, furniture cups and other means of load spreading will help reduce the risk of indentation to the floor when used under heavy load bearing furniture and appliances.
- We do not advocate the use of other cleaning products, as they may not work as efficiently or effectively and may cause damage to the floor or leave the surface with a slippery residue.

INTERNATIONAL
FLOORCARE
STARTER KIT

Amtico International FloorCare Starter Kit

Our kit contains:

Maintainer x 1 litre

Spillage Remover x 500ml

Protective Felt Pads

Nylon Cleaning Pad

Wear & Care Leaflet

AMTICO INTERNATIONAL INSTALLATION

FOR FULL DETAILS VISIT WWW.AMTICO.COM

Installation (general)

Good preparation is vital for a trouble free installation and Amtico International products can be laid on concrete, timber, stone and many other sub-floors which have been suitably prepared. Site conditions must comply with the relevant local/national regulations. Amtico International products are not suitable for external installations, wet-rooms, pool-side areas or unheated locations. Products can be used with underfloor heating (we recommend that Amtico International HT Adhesive is used in this situation), which should be switched off for 48 hours before and 48 hours after installation (Spacia Access can be used with underfloor heating when installed with a permanent adhesive). The recommended maximum surface temperature is 27°C (81°F) and during its life, a floor should not be allowed to cool below 13°C (55°F). Tiles, adhesive and sub-floor must be allowed to stabilize to a consistent temperature between 18°C – 27°C (64°F – 81°F) for a period of 24 hours before and 24 hours after installation. Following installation the floor should be protected from heavy traffic for 24 hours and not washed for 48 hours.

Sub-floors

Always follow other manufacturers' recommendations when using their proprietary materials for sub-floor preparation. Direct to earth (on- and below-grade) concrete and stone sub-floors must have an effective damp proof membrane (vapor retarder). Careful sub-floor preparation is essential for an excellent floor appearance and good tile adhesion. The sub-floor must be hard, smooth, clean, dry, free from defects and suitable for purpose. A suitable levelling compound should be used to ensure that no irregularities show through to the surface of the finished floor. In all cases the sub-floor must be sufficiently dry and the moisture content checked using a suitable moisture test. Readings higher than those permitted by local/national regulations will require corrective action – either time for the sub-floor to dry sufficiently or the use of a suitable surface damp proof membrane (moisture suppressant).

New Concrete

Will contain a high percentage of residual moisture. Either allow sufficient time to dry thoroughly or apply a surface DPM, which may require priming. Apply levelling compound.

Old Concrete

Must be cleaned of all paint, grease, wax and any other foreign matter. If floor is adequately dry, apply a levelling compound.

Old Resilient Floors

Existing tiles should be lifted and adhesive residues removed by scraping (not applicable when using Spacia Access tiles). No solvents or abatement chemicals should be used to remove old adhesive. Apply a levelling compound. NB - As a safety precaution when lifting vinyl asbestos tiles, the appropriate safety measures should be adhered to.

Terrazzo/Stone/Quarry Floors

Repair worn or damaged areas, de-grease and apply a levelling compound.

Timber/Plywood

Must be overlaid with a minimum 6mm (1/4") exterior or flooring grade plywood, which must be suitably secured. A suitable feathering compound should be used to ensure the joints are not visible when the installation is complete.

AMTICO INTERNATIONAL ADHESIVES

Amtico International PS Adhesive

A single part, water-based synthetic polymer adhesive with an extended working time of 3 hours. It is solvent free, non-flammable and protected against bio-degradation and mould growth. It is certified as EC1 – very low emissions. Not recommended for areas subject to heat or moisture. Suitable for use with Amtico Marine.
3kg / 6kg / 14kg
Globally available

Amtico International 373 Adhesive

A water-based acrylic adhesive recommended for all areas except those subject to heat or moisture.
1 gal / 4 gal
North America only

Amtico International Universal 2-Part Adhesive

A solvent free adhesive. It is certified as EC1 – very low emissions. It is recommended for areas subject to heat and moisture variations. Suitable for use with Amtico Marine.
2.5kg (0.44gal) / 6kg (1.06gal)
Globally available

Amtico International Tackifier

A water-based, solvent-free dispersion adhesive designed for use as a tackifier for installing Spacia Access products. It is supplied ready for use and dries to a clear film onto which tiles can be loose laid.
6kg / 14kg
Availability: contact your local Amtico International office

Availability: contact your local Amtico International office

Usage of Amtico International Adhesives

Follow the instructions on the labelling, paying particular attention to the pot life and working times. Spread adhesive evenly using a trowel with notch size or V notch 1/16th" x 1/16th" x 1/16th" (USA). Do not use worn trowels. Only spread sufficient adhesive that can be covered within the recommended open time. The tiles should be rolled with a 100lbs roller as soon as possible after installing and before the adhesive sets – timing will depend on site conditions and adhesive selection, but is likely to be around 30 – 60 minutes for PS Adhesive, 3 – 4 hours for Universal 2-Part Adhesive. Always clean away excess adhesive before it is allowed to dry, use a soft cloth moistened with Amtico International Adhesive Remover. Dried adhesive can be removed by carefully scraping it off the tile, or by using a 3M blue pad moistened with Amtico International Adhesive Remover.

Designed for a sustainable future

Our commitment to the environment began long before anyone was required to think about corporate sustainability, and it's still something we care about. Our aim is to continue to work towards creating a truly sustainable business - building upon the good work we began many years ago.

Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch, and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification.
